

ImpactusAll MVP - Quick Start for Next Phase

🎯 Current Status (December 11, 2025)

Platform Admin Phase 1:  COMPLETE

Production Deployment:  LIVE at <https://impactusall.abacusai.app>

Database Migration:  APPLIED to production

📦 Project Locations

GitHub Repo: <https://github.com/MrD-D-tech/impactusall-mvp>

Local Project: /home/ubuntu/github_repos/impactusall-mvp/nextjs_space/

Branch: master (latest commit: 0081346)

🔑 Test Credentials

- **Platform Admin:** platform@impactusall.com / admin123
 - **Charity Admin:** admin@northernhospice.org.uk / admin123
 - **Corporate Donor:** corporate@manutd.com / admin123
-

✓ What's Working

1. Platform Admin Dashboard

URL: <https://impactusall.abacusai.app/platform-admin>

- Overview page with stats cards, alerts, activity feed
- Navigation sidebar with all links
- Activity logging system

2. Manchester United Hub

URL: <https://impactusall.abacusai.app/manchester-united>

- Fully functional donor hub
- Branded with Manchester United colors
- Impact metrics displaying
- Investment amount showing

3. Database (Production)

-  4 Charities
-  2 Donors (Manchester United Foundation, TechForGood UK)
-  ActivityLog table created
-  Donor table created
-  All migrations applied

4. Other Working Features

- Charity Admin Portal (AI story generation, rich text editor)
 - Corporate Donor Portal (analytics, PDF reports)
 - Authentication & User Management
 - Email Notification System
-

What's NOT Built Yet

Platform Admin Pages (Navigation exists, pages are empty)

1. `/platform-admin/charities` - Charity Management
 - View all charities
 - Approve/reject applications
 - Manage subscriptions
 - View charity details
2. `/platform-admin/donors` - Donor Management
 - View all corporate donors
 - Manage donor relationships
 - Track donations
 - View donor analytics
3. `/platform-admin/content` - Content Moderation
 - Review flagged stories
 - Review flagged comments
 - Moderate user-generated content
4. `/platform-admin/analytics` - Analytics Dashboard
 - Platform-wide metrics
 - Revenue tracking
 - User engagement stats
5. `/platform-admin/users` - User Management
 - View all users
 - Manage roles and permissions
 - User activity tracking
6. `/platform-admin/settings` - Settings Page
 - Platform configuration
 - Email templates
 - System settings

Public Charity Pages

- **NOT BUILT** - Only donor hubs exist (like `/manchester-united`)
 - Charities only have admin dashboards, no public pages
 - Would need to build `/charities/[slug]` or similar
-

Next Priority: Mini-Build 2

Focus: Charities & Donors Management Pages

Deliverables:

1. Complete `/platform-admin/charities` page with:

- List view with filtering and search
- Approve/reject functionality
- Subscription management
- Detailed charity view modal

1. Complete `/platform-admin/donors` page with:

- List view with filtering and search
- Donor relationship management
- Donation tracking
- Detailed donor view modal

2. Advanced features:

- Bulk actions
- Export functionality
- Advanced filtering
- Sorting and pagination

Important Files

Documentation:

- Full Handover: [/home/ubuntu/github_repos/impactusall-mvp/HANOVER_PHASE1_COMPLETE.md](#)
- This Quick Start: [/home/ubuntu/github_repos/impactusall-mvp/QUICK_START_NEXT_PHASE.md](#)
- Conversation Starter: [/home/ubuntu/github_repos/impactusall-mvp/CONVERSATION_STARTER.md](#)

Key Source Files:

- Prisma Schema: [nextjs_space/prisma/schema.prisma](#)
- Platform Admin Overview: [nextjs_space/app/platform-admin/page.tsx](#)
- Activity Logger: [nextjs_space/lib/activity-log.ts](#)
- Auth Config: [nextjs_space/lib/auth-options.ts](#)
- Database Client: [nextjs_space/lib/db.ts](#)

API Routes:

- Platform Admin APIs: [nextjs_space/app/api/platform-admin/](#)
 - Charity Admin APIs: [nextjs_space/app/api/charity-admin/](#)
 - Corporate Dashboard APIs: [nextjs_space/app/api/corporate-dashboard/](#)
-

Development Commands

```
# Navigate to project
cd /home/ubuntu/github_repos/impactusall-mvp/nextjs_space

# Install dependencies
npm install

# Generate Prisma client
npx prisma generate

# Run development server
npm run dev # Starts on http://localhost:3000

# Build for production
npm run build

# Start production server
npm start
```

Database Information

Local Database:

- Type: PostgreSQL
- Database: impactusall_test
- Host: localhost:5432
- User: impactus_user
- Password: impactus_pass123

Production Database:

- Managed by Abacus.AI Platform
- Connection string in .env file (DATABASE_URL)
- Access via Abacus.AI dashboard

Key Models:

- User - All user types (Platform Admin, Charity Admin, Corporate Donor)
- Charity - Charity organizations
- Donor - Corporate donors
- Story - Impact stories
- Comment - Story comments
- ActivityLog - Audit trail (NEW in Phase 1)

Git Workflow

```
# Navigate to repo
cd /home/ubuntu/github_repos/impactusall-mvp

# Check status
git status

# Add changes
git add .

# Commit with message
git commit -m "Your descriptive message"

# Push to GitHub
git push origin master

# Pull latest changes
git pull origin master
```

Production URLs

Main Site: <https://impactusall.abacusai.app>

Portals:

- Platform Admin: <https://impactusall.abacusai.app/platform-admin>
- Charity Admin: <https://impactusall.abacusai.app/charity-admin>
- Corporate Dashboard: <https://impactusall.abacusai.app/corporate-dashboard>

Donor Hubs:

- Manchester United: <https://impactusall.abacusai.app/manchester-united>
- TechForGood UK: <https://impactusall.abacusai.app/techforgood-uk>

Troubleshooting

If you get database errors:

```
npx prisma generate
npx prisma db push
```

If you get build errors:

```
rm -rf .next
npm run build
```

If you get authentication errors:

- Check `.env` file has `NEXTAUTH_SECRET` and `NEXTAUTH_URL`
- Verify database connection

If you get Git push errors:

- Make sure you're on the correct branch: `git branch`
 - Pull latest changes first: `git pull origin master`
-

 **Need More Details?**

See the full handover document: `/home/ubuntu/github_repos/impactusall-mvp/HAN-DOVER_PHASE1_COMPLETE.md`

This contains:

- Complete project overview
 - Detailed tech stack information
 - Full database schema
 - All API routes
 - Environment configuration
 - Comprehensive troubleshooting guide
 - And much more!
-

Last Updated: December 11, 2025

Status:  Ready for Mini-Build 2
